Procedure – Credit Equivalency by Licensure or Certification and State Seal of Bilitery

A student who has already obtained an industry recognized license or certification, for which the college offers a career and technical certificate or degree curriculum, may be granted credit for specific courses in the program of study listed in the table below. The following process will be followed to determine if credit will be granted:

1. Student must confer with an advisor in the program or department for which credit is being sought prior to submitting an application. Credit is limited to specific credentials. Additional experience and/or documentation may be required.
2. Student may submit the Application for Credit Equivalency by Licensure or Certification application immediately. Equivalency credit will not be awarded until nine (9) semester hours of credit at an IECC college have been completed.
3. Student will submit the application to the Assistant Dean for Student Services. Application will include the original certification and certification number (if appropriate) along with an authorization to contact the certifying body for verification. The college's Assistant Dean for Student Services will review the application considering currency of licensure.
4. Approved credit will be posted to the student's transcript after the application has been reviewed, recommended and approved by the instructor/advisor and the college's Dean of Instruction.
5. Credits received by students that are based on licensure or certification will not be used to award financial aid or veteran's benefits.
6. IECC does not accept the credit for licensure or certifications awarded at other institutions.
