COMPUTER SKILLS FOR THE WORKPLACE

ONLINE | SELF-GUIDED OR INSTRUCTOR MODERATED | \$147

Most jobs today require a working knowledge of certain computer skills. Employers seek and reward employees who can effectively send emails, create spreadsheets, manage databases, understand memory and network limitations, and recognize the function and features of modern computer components. Any job candidate who already possesses these skills will stand above those who do not.

This course is designed to provide the fundamental computer competencies you need to survive and prosper in today's fast-changing workplace. You will learn how to implement the powers of modern office software to work faster and more efficiently. This course will also focus on practical applications for software most common to the workplace. By the time you finish, you will have learned why employers consider technological literacy so critical to the success of any organization.

HOW TO GET STARTED IN GAME DEVELOPMENT

ONLINE | SELF-GUIDED OR INSTRUCTOR MODERATED | \$144

There has never been a better time to start a career in the game development industry. Games can be found on computers, the web, gaming consoles, and virtually every mobile tablet and phone. Industry forecasts indicate that gaming will be worth close to \$100 billion dollars in the next two years. Talented, creative, and enthusiastic people are in great demand in this industry. Whether you want to start your own independent game project in your basement or work with a small creative team or for a large game development studio, this course will prepare you to start developing your own games.

You will start by learning the fundamentals of game development and get an overview of game genres, platforms, and audiences. Next, you will learn tools and techniques to help you make better design decisions and achieve greater efficiencies as you develop your own games. You will learn why many games fail and how to ensure your games are positioned for success. During the course, you will gain hands-on experience in many of the game development processes. By the end of the course, you will have the experience and confidence to start developing your own games.
