APRIL 14, 2023**

### **FSI: At the Intersection of Teaching, Learning, and Technology**

is an annual conference that brings educators and instructional-technology professionals together each May at the University of Illinois Urbana-Champaign. Attendees come from across Illinois and as far away as Canada. The conference features keynote presentations, networking, and hands-on training on the use of modern communication and information technologies in education. Participants are encouraged to share their experiences and teaching methods in person and virtually. **Networking is a main component of FSI**, and there are many opportunities for social engagement during receptions, scheduled activities, and concurrent sessions.

FSI was founded between 1996-1997 when the Presidents and Chancellors of Illinois public universities called for the development of an *Inter-institutional Faculty Summer Institute on Learning Technologies*. Since then, this popular conference has been supported by the Illinois Board of Higher Education, directed by a succession of steering committees, and enjoyed by all who appreciate the ideas and information shared at this annual event. **The 2023 conference theme is "Designs for Learning", ADAPT, EVOLVE and ENGAGE.**
