

## Driver Education Single Driver Permission Slip

Every effort is made to ensure each behind-the-wheel training session lasts at least two hours (one hour drive and one hour observation for each student). For this to occur, two student drivers are required for each time training session.

Unfortunately, there are times a student won't show up and we end up with one trainer and a student. To allow a training session to continue with only one student and the trainer, the Secretary of State requires signed permission from the parents to allow for this. By having this signature in advance, delays in student outcome are mitigated and inconvenience of missed scheduled times is avoided. This form is not required.

I give the child (print child's name) \_\_\_\_\_  
under my guardianship, permission to go out on a drive alone  
with an adult trainer.
