

INDUSTRIAL MAINTENANCE HVAC I CERTIFICATE (INDMA C504)

FCC	LTC	✓ OCC	WVC
-----	-----	--------------	-----

The Industrial Maintenance HVAC I certificate program will provide students with the skills required to enter the field of heating, ventilation, and air conditioning. Students will be qualified to find jobs as entry-level HVAC technicians. Installation of new systems and repair to existing HVAC systems for residential and commercial (small business) purposes will be covered. This program also targets incumbent workers who desire to broaden their skills for a career change or for advancement consideration.
